

Novell ZENworks Asset Management

What is it?

- Product that provides a complete and accurate view of hardware and software installations and license compliance
- Asset inventory, software usage, contract administration and license reconciliation product

What customer problems does it solve?

- Cost of manually inventorying network resources
- Reconciling installed applications with purchasing records
- Compliance with software licensing rules
- Overbuying software licenses and maintenance coverage

Which products are the main competitors?

- Microsoft Software Asset Management*
- Peregrine AssetCenter*
- Altiris License Compliance Suite*

- Altiris Inventory Solution*
- LANDesk Inventory Manager*
- LANDesk Asset Manager*

What are the Novell advantages?

- Intelligent asset recognition prevents over-counting and lowers compliance risks
- Unique “license view” distinguishes between suites/suite components and runtime/full-product versions
- Better accuracy with data normalized by manufacturer, product, edition and version
- More than a simple inventory tool, it includes usage, contract administration and license reconciliation features
- Reduced IT costs and more efficient allocation of licenses
- Enforcement of software standards, with accurate discovery and reporting
