

Bytes INFORMATION SECURITY FORUM (ISF) SERVICES

Audits and advice – so you can use frameworks to maximum effect

Are you keen to strengthen risk management, sharpen supply chain security and ramp up your defences against insider threats and other dangers? Bytes can help you to check the frameworks you need and leverage them in the most effective way.

Let's turn complex into simple

The ISF Standard of Good Practice (SoGP) can sound daunting with its 4000-plus controls. Not surprisingly some companies can get overwhelmed and lost in the complexity. However, Bytes can show you how frameworks can be used effectively and fit together to increase coverage and depth of protection.

Staying mission-focused

We start with identifying your needs and desired outcomes - before evaluating the maturity of your organisational and technical controls. We can then pinpoint exactly where you need to prioritise.

Our expertise extends across key frameworks

Information Security Management / Assets <i>(ISO 27001)</i>		Governance <i>(Cobit 5)</i>	Third Parties <i>(ISO 27001)</i>	IT <i>(Cobit 5)</i>	Risk <i>(ISO 3100 / IRAM2)</i>	
Privacy assets (DPA / GDPR) <i>(ISO 29100 / 27001)</i>	Commercial general requirements <i>(ISO 27001)</i>	Government general assets <i>(ISO 27001)</i>	Information security governance <i>(ISO 27014)</i>	Suppliers <i>(ISO 27036)</i>	Asset control <i>(ITIL / ITSM)</i>	Information risk management <i>(ISO27005)</i>
Payment assets <i>(PCI DSS)</i>	Commercial specific assets <i>(Per contract requirement)</i>	Government specific assets <i>(Co Co / IS1 / RMADS etc.)</i>	Specific governance <i>(NCSC / other recommendations)</i>	Supplier specific requirements <i>(As per contract)</i>	Technical security <i>(ISO 27002, NIST, CIS, SANS, GPG's etc.)</i>	Specific risk management <i>(As required - COSHH, OHAS etc.)</i>

We provide consultancy in key areas...

Standard of Good Practice

- Security radar, healthcheck and benchmark
- Aligned reporting with multiple standards
- Audit once, report on all
- New controls and policies for high-risk areas

Benchmarking

- Readiness checking for standards compliance
- Assessment of security policies and performance
- Comparisons with industry sector

Risk Assessment (IRAM2)

- Identification of risk appetites
- Assessment of threat profiles and vulnerabilities
- Development of pragmatic responses

Supply Chain/Third Party Assessment

- Risk exposure analysis
- Suppliers ranked by sector
- Processes and controls for vendor management
