INTEGRATION SPOTLIGHT: OKTA & MICROSOFT

Why do Customers choose Okta for Microsoft Technologies?

Okta is certified by the Azure Team and is a Microsoft Gold Partner

Okta's integrations offer value around simplification, high availability and security

Why Okta?

With deep integrations to over 5,000 applications, the Okta Identity Cloud enables simple and secure access from any device at any time. Okta's products are not only user friendly, but are also extremely easy to implement.

- **Single Sign On**
- **Multi-Factor Authentication**
- **Lifecycle Management**

Office 365

Office 365 is growing rapidly and the biggest hurdle to getting all users onboard is often identity and mobility management. Office 365 continues to be the most popular app deployed using Okta for identity as Okta can shorten deployment to as little as a few days. Okta also offers unique functionality for automation and user experience that leads to long term cost savings.

- **100% Cloud-based identity solution**
- **Automated Office 365 license management**
- **Just in time user provisioning, one-click deprovisioning**

Microsoft Azure AD

Customers using Azure cloud applications like O365 are provisioned by default in Azure AD. For synchronizing user accounts from on-premises AD into Azure AD there are several trade-offs around on-premises footprint, availability and security. Okta has an agentless custom integration with Azure Active Directory that allows Okta to do the lifecycle management of users.

- **Automate provisioning, updating, and deprovisioning of user accounts into Azure AD**
- **Simplify hybrid environments**

Featured Customer - Adobe

20,500 Adobe employees are using Okta for SSO into 300 enterprise apps, including Office 365. The company decided to deploy Microsoft Office 365 to all its employees-moving email, calendaring, and SharePoint tools to the cloud. After reviewing their options and Okta's record in the industry, Adobe IT decided to sunset the internal single-sign-on system and deploy Office 365 with Okta authentication.

Why Bytes?

As the UK's largest provider of Microsoft Azure and O365, Bytes Software Services are perfectly positioned to help you define your security strategy. We partner with Okta as a leading vendor in securing your identities accessing your applications, whether on-premises or cloud based, Microsoft or otherwise.
