

The Future Is in The Cloud – Are You Ready?

Cloud & Application Market Review

As organisations increasingly migrate their operations and applications to the cloud, they encounter a host of new challenges. Simply lifting and shifting on-premises solutions won't suffice to address cloud-centric security considerations. Fortunately, many innovative technologies have emerged to tackle these very issues.

- **Application Security Testing (SAST, SCA)** spreads DevSecOps methodologies from looking at code in development, all the way into the management and maintenance of the cloud platforms themselves.
- **Cloud Native Application Protection Platforms (CNAPP)** look directly at security posture, configuration, and vulnerabilities across multi-cloud environments.
- **Cloud Service Network Security (CSNS)** solutions protect the external facing elements, helping to maintain operational ability and data security.
- Across all these elements is the need to maintain least privilege access for developers and administrators.

Bytes are able to help by simplifying an incredibly complex market, saving you time and providing greater clarity regarding the technology landscape.

Key Steps

Understand:

- Overview of your dev processes and cloud platforms
- Your security road map & requirements

Overview:

- Where you are on the journey of development to deploy to customer interaction
- How can security tools transform the way you work
- Which vendors & vendor comparison

Evaluate:

- Pairing client requirements to technology landscape
- Narrowing down potential vendors

Key Features & Benefits

- ✓ A Rounded Understanding Of Your Environment
- ✓ Simplified View Of The Market
- ✓ Bespoke
- ✓ Zero Cost
- ✓ Independent Advice

Our Methodology

Our security specialists work with you to identify your key business challenges and requirements, then walk you through the various options that you have to strengthen your security posture.

The result – clear and simple guidance to further the security of your cloud and applications.

Tech Areas: SAST, SCA, WAAP, CNAPP, CNAP, WAF, NGFW, DAST

During this engagement **Bytes** security experts will guide you through the cloud & app security challenges & how best to solve them with a vendor agnostic approach, ensuring the best fit for your organisation.

- 1:1 Interactive Session
- Expert Advice and Guidance
- Can support multiple stakeholders
- Sessions run remotely or in person
- Experience across entire Application and Cloud Security spectrum
