

# The New Edge Market Review

As working practices change and businesses evolve to meet the demands of their workforces, clients and competition, traditional networking and infrastructure have fallen by the wayside. With the emergence of cloud, SaaS & hybrid working there is an ever increasing need for progressive technology that can keep up with the new and developing security challenges.

This is where the **New Edge** comes in; a security approach that ensures all areas of your organisation are secure and not just those located behind the firewall. Securing the new edge involves a combination of technologies coming together including:

Zero Trust Network Access

CASB

Secure Web Gateway

SD-WAN

Firewalling

DLP

**Bytes** are able to help by simplifying an incredibly complex market, saving you time and providing greater clarity regarding the technology landscape.

## Key Steps

### Understand:

- Overview of the clients network
- Client security road map & requirements

### Overview:

- What is the New Edge?
