

Microsoft Azure

Bytes **AZURE COST SAVINGS SERVICE**

Bytes have launched the **Azure Cost Savings Service** to reduce significant costs for those currently consuming Azure. This consists of three offerings which help identify areas to save money.

Discover how the latest Azure Offers could be applied and save on additional fees based on consumption and workload. Our customers have seen significant savings of up to 76% on cool storage analysis for large data sets that are infrequently accessed, and up to three months' Azure usage credited back to their accounts.

Azure Committed Instances

Where you have steady state, predictable workloads running in Azure, we will identify those which qualify for a significant discount by pre-purchasing for 12 months. By making a commitment to Microsoft, you could see discounts of up to 63% on all VMs.

Reduced Dev/Test Costs

A great way to run your test and development workloads on Azure – Windows and Windows Server Virtual Machines, Cloud Services, Web Apps and HDInsights may be discounted off your normal Enterprise Agreement rates.

Hybrid Use & License Mobility

Our analysis will establish where it is commercially beneficial to deploy existing licences on the Azure cloud platform, identifying cost savings whereby you can run Windows Server virtual machines at Linux compute rates – saving up to 40% through the Azure Hybrid Use Benefit.

Annual Cost
without Azure Hybrid
Use Benefit

£2,313

Annual Cost
with Azure Hybrid
Use Benefit **£1,386**

**Saving
40%**

Savings based on two D2 v2 Promo VMs in West US 2 Region running 20 hours/day for one year (365 days), base compute rate at Linux rate for West US 2, and Software Assurance cost (Level A) for Windows Server Standard edition (one 2-processor licence or a set of 16 core licenses). Actual savings may vary based on location, instance type or usage. Prices as of April 2017. Prices subject to change. Actual savings may vary based on location, instance type or usage.
