Bytes
& FORCEPOINT

FORCEPOINT
POWERED BY Raytheon

Platinum Partner

Bytes and Forcepoint – working together to help businesses detect, defend against and defeat cybercrime both inside and outside their organisation.

In January 2016 Bytes longstanding Platinum content and data security partner Websense became Forcepoint™, combining with cybersecurity giant Raytheon. Forcepoint was created to empower organisations to drive business forward by safely embracing transformative technologies – cloud, mobility, Internet of Things (IoT) & others – through a unified, cloud-centric platform.

Bytes and Forcepoint Partnership

Forcepoint unites the user protection, data security and cloud expertise of Websense with the defence-grade insider threat technology of Raytheon and the cloud access security broker (CASB) capabilities of Imperva, acquired in 2017.

Due to their long-standing top tier Platinum Partner Status with Forcepoint, Bytes is in a unique position to ensure custoimers get the maximum benefit from the various Forcepoint technologies, including the Triton APX web, email and data security solutions, the defence grade insider threat protection from Forcepoint Sureview and their emerging CASB suite.

Who are Forcepoint

The new combined Forcepoint organisation brings together decades of front-line experience across many domains of cybersecurity, from FTSE100 enterprise and mid-sized UK businesses in every industry, to the world's most highly secure defence central government and law enforcement agencies.

Forcepoint's portfolio of products safeguards users, data and networks against the most determined adversaries, from accidental or malicious insider threats to outside attacks, across the entire threat lifecycle. Forcepoint protects data everywhere - in the cloud, on the road, in the office - simplifying compliance and enabling better decision-making and more efficient security.

Their solutions span the following 4 Areas to provide Businesses with 4D security:

Defend - Detect - Decide - Defeat (4D Security) is the vision for Forcepoint.

FORCEPOINT SOLUTIONS

Triton APX
