

Bytes SECURITY SOLUTIONS FOR THE ENTERPRISE

Challenged with securing business growth and productivity?

It has never been more critical to properly plan, deliver and manage security investments to protect your business against emerging threats.

Corporate data and assets are increasingly complex to secure. Companies are facing larger security threats due to an exponential rise in data, increased remote working in the organisation, the adoption of cloud and virtualisation technologies and a new breed of professional attacker armed with more sophisticated attack methods.

Bytes in-depth market knowledge, technical delivery expertise and strong partnerships with the world's leading security technology providers gives IT teams both large and small the ability to meet and manage their business and security objectives.

Who we are

Founded in 1999, Bytes Security Partnerships combines the agility and specialist market knowledge of a small independent specialist reseller with the scale, backing and global resources of a large global software group. From niche security projects and requirements in 250 - 10,000s of users in the largest disparate multinational.

Where we help

**Audit, Assess
& Review**

**Strategy
& Design**

**Install &
Implement**

**Manage
& Monitor**

Our accredited and experienced technical consultants and account managers help you:

- **Understand** what you need to do to secure your business and prove the value of your security investments
- **Design** your target estate including security solution scoping, licence optimisation and technical delivery
- **Define** a project plan to ensure solutions are implemented optimally and on time
- **Deliver** the solutions on time and to budget with hand in hand support
- **Ease day to day management** of security with support and training
- **Plan ahead** to make sure your security technologies keep pace with threats
- **Achieve enterprise level security** while meeting cost efficiency challenges

We combine understanding and active management of organisations' existing infrastructure with in-depth knowledge of emerging threats and technologies to futureproof your security.

Security Solutions FOR THE ENTERPRISE

What we do

Bytes scope, design and deliver tailored security solutions from world leading technology providers. We scan the market to find the most appropriate technologies to meet your business challenges and then deliver those in individual packages unique to each business.

All security solutions are scoped, designed, installed, maintained and supported by our expert, full accredited Technical Services and Support teams. We also offer full training and knowledge transfer services which enable your security team to effectively manage the technologies once in place.
