Azure

Bytes
END USER COMPUTING ON MICROSOFT AZURE

Now is the perfect time to move your **End User Computing (EUC)** to the Cloud and gain a host of outstanding benefits. **With Bytes and Microsoft Azure, everything is within easy reach.**

Achieve your goals, empower your users

With Bytes EUC on Azure, you can take greater control and simplify how users access applications and data in the Cloud. You can deploy enterprise applications and virtual desktops from Azure, from your own datacenters, or a combination of both.

Bytes has the application and desktop expertise to get you off the ground quickly. We can deliver enterprise-class VDI/DaaS, underpinned by 100% application virtualisation to ensure security compliance and can even help your organisation towards GDPR compliance.

Your next IT challenge? No problem

With Bytes EUC on Azure, the time, cost and complexity of transformation can be reduced considerably. **You'll be on the front foot when major projects spring to life.**

The Bytes EUC Team can help you to succeed with the following IT challenges and many more besides:

- **Windows 10 adoption**
- **Office 365 and mobility (BYOD)**
- **Desktop cloud delivery**
- **Application rationalisation**
- **100% application virtualisation and delivery**
- **Distributed or global workforce**

Ever yearned for IT to be so much simpler to manage?

With Bytes EUC on Azure, that's exactly what you get — so you can free up valuable resources.

We're able to simplify and reduce the IT management overhead by:

- **Keeping all your applications in one place**
- **Ensuring you've got the single (latest) version of all apps**
- **Enabling simplified (centralised) patching and management**

Why trust Bytes

As the largest Microsoft cloud UK provider, Bytes know how to deliver your digital workspace on Azure — and get the best results. We've also got the largest dedicated virtualisation team in the UK too, so we can meet your expectations. Our EUC specialists and dedicated Cloud Architects will understand precisely what you need, because every EUC deployment on Azure is unique.

EUC on Microsoft Azure:
We'll get you there quickly

> We follow a five-step deployment path, from early discovery and architectural design, through to implementation and ongoing 24x7 support.
> We also provide a Free Azure proof of concept environment
> Our approach is solution-led, not product focused
> When you need to add technologies — we'll provide valuable independent advice
> We're professional, working to your timelines, budget and objectives

IT Platforms, Software Portfolio, Compute Workloads, Storage, Security, Back-Up, DR

Discover more: Book your FREE EUC Assessment

It's simple to get started. Contact your Bytes account manager today to book your Assessment to discover how Bytes EUC on Azure can benefit your organisation.

First, we'll discuss what you're looking to achieve. Perhaps you're embarking on a new VDI, migration or have other IT objectives? We'll examine where you stand today, get a baseline of your current environment and pinpoint any special challenges.

Then we'll explore how EUC on Azure could make the difference in key areas such as performance, flexibility, management and cost. We'll provide actionable findings that will help you to make the clearest decisions over your EUC strategy in the Cloud.
