

Bytes **RED HAT SOLUTIONS ON AZURE**

The perfect match, plus outstanding BYOS savings

Your **Microsoft cloud** and **Red Hat** open source technologies can be together at last. **And there's more great news too.**

With Bytes, the UK's largest Microsoft Cloud partner, you can explore the many benefits of 'bring your own subscription' (BYOS) as you move to Microsoft. It's substantially cheaper and gives you more control compared to the Azure Marketplace. Then we'll help you on your way to a smooth transition — with expert advice when it's needed.

The benefits of moving your Red Hat to Microsoft Azure

Easy to get started

Use Red Hat **Cloud Access** to move your Red Hat subscriptions to Azure in 3 easy steps.

Comprehensive support

Get global support across hybrid environments from Red Hat and Microsoft in 18 regions. Whether you run Red Hat products on premise or in Microsoft Azure, you'll get a consistent support experience.

Manageability

Red Hat CloudForms manages Azure virtual machines (VMs) in addition to VMware, Red Hat OpenStack® Platform, Red Hat Virtualization, Microsoft Hyper-V, and Amazon Web Services (AWS). This lets you manage workloads across physical, virtual, and private and public clouds.

Choice without complexity

Choose where to run your applications—in your datacenter or in the cloud—expand your IT options without adding complexity.

New application development capabilities

Developers can direct their apps developed on Microsoft .NET to infrastructure powered by Red Hat Enterprise Linux, including Red Hat OpenShift.

Portability

Red Hat Enterprise Linux on Microsoft Azure provides a consistent enterprise platform and application programming interfaces (APIs) for certified apps and containers, resulting in portability across physical, virtual, and private and public clouds.

Red Hat products offered on Azure with BYOS:

- Red Hat Enterprise Linux
- Red Hat Enterprise Linux for SAP
- Red Hat Linux for SQL Server
- Red Hat Storage
- Red Hat OpenShift container platform
- Red Hat Jboss Middleware
- Red Hat CloudForms

Why Bytes

- We are **best positioned to review your investments**, give you advice on how/when to migrate and ensure you stay compliant
- We can offer **BYOS** which represents **20-30% savings compared to the Azure Marketplace**
- Our strategic relationships with Microsoft and Red Hat means we can **ensure a smooth and supported transition**
