

# Bytes ISO 27001 ADVISORY SERVICES Use our leading expertise – from early planning to audit readiness

Achieving and maintaining ISO 27001 doesn't have to be complex and costly for your business. Our professionals can help you from the start in gaining management support, and then provide expertise at any stage, right up to the point of pre-certification audits.

### Hitting the right standard

ISO 27001 has become the mainstay of information security standards with its usage increasing. The UK has the second highest number of certifications worldwide, following Japan – where it is a mandatory requirement for security when processing privacy data.

### **Expert help available**

Bytes can help you through the process. We have consultants that hold both (Senior) Lead Implementer and Lead Auditor qualifications and have been through the process of achieving ISO 27001. We know what it takes - and the most cost-effective route for your organisation.

### Keep on top of quality

Our ISO 27001 services enable you to focus on what is important to optimise both your protection and spend, using a structured framework. That means no more gaps, no more spend on unnecessary solutions - just simply use our services to keep up with your business needs.

With Bytes, you can benefit from our expert support in key areas ...

## Setting the right course

- Management support with building your business case
- Defining the scope of what you need to cover
- Creating your inventory of information assets
- Conducting a risk assessment that's business focused
- Selecting the right stance around risk and control

# Getting to your goal

- Creating an ISMS implementation programme
- Establishing a management system for policies and controls
- Gathering operational evidence from operating the ISMS
- Internally auditing the ISMS controls to check effectiveness
- Reviewing results and carrying out corrective action
- Preparing your team for the certification audit
