AWS EUC SOLUTIONS

Be productive anywhere with Amazon WorkSpaces

Businesses today need to support a flexible, global workforce that can work remotely, securely and on the go. This is where Bytes AWS EUC Solutions can help. Our AWS experts are on hand to setup solutions that help your business thrive in the modern world.

This service focusses on Amazon WorkSpaces. Bytes AWS will design and build an Amazon WorkSpaces environment to suit your business requirements. And we'll provide the training and support you need to help you get the most from your investment.

What is Amazon WorkSpaces?

Amazon WorkSpaces is a secure, managed cloud desktop solution. It allows users to access their desktop anywhere, anytime. It is one of the AWS End-User Computing (EUC) services.

WorkSpaces enables users to access their desktop on PC, Linux, Mac, iPad, Kindle Fire or Android tablet. An Amazon WorkSpace desktop can be setup within minutes and can act as a replacement for a traditional desktop. Many thousands of desktops can be deployed and managed centrally using one simple AWS console.

Who is it for?

Amazon WorkSpaces is ideal for organisations that want to:

✔ Enable **Bring Your Own Device** (BYOD)

✔ Provide **secure desktops** for their remote or contract workers

✔ **Increase remote working** across the business

✔ **Limit reliance** on physical desktops and hardware

✔ **Rapidly provision and scale desktops** for software test and dev

✔ Grow and so require **rapid setup of new desktops**

✔ **Quickly provision persistent desktops** for classrooms and labs

✔ **Enable rapid integration** during a merger or acquisition

Be productive anywhere with Amazon WorkSpaces

How does our service work?

This service helps your business make a smooth, stress-free transition to WorkSpaces.

Bytes AWS EUC experts will:

1. **Evaluate your businesses' technical requirements**

2. **Design and build proof of concepts**

3. **Apply for funding to support the cost of moving to AWS**

4. **Run in-depth collaborative workshops**

5. **Provide after-care support and training**

Key Benefits

Reduced Costs

Amazon WorkSpaces eliminates the need to buy more laptops or desktop computers. There's absolutely no upfront fees or term commitments - billing is hourly or monthly and you only pay for what you use. WorkSpaces also enables remote working, which helps you cut office utility bills, carbon emissions and datacentre bills too.

Keeps your Data Secure

Security of user data is taken seriously. Unlike other virtual desktop solutions, no user data is stored on the local device. WorkSpaces is deployed in a Virtual Private Network (VPN) and each user is given access via persistent encrypted storage volumes in the AWS Cloud, which is integrated with the AWS Key Management Service (KMS).

Simplify Desktop Delivery

Cut down on unnecessary tasks. WorkSpaces eliminates the day-to-day administration associated with standard desktops. It makes deploying, maintaining, recycling and provisioning desktops a thing of the past. There's much less hardware to manage and you'll no longer need to deploy complex, unscalable virtual desktop infrastructure (VDI).

Centrally Manage & Scale your Global Desktop Deployment

Amazon WorkSpaces is available in 13 AWS Regions, so your team can have high performance cloud desktops wherever they are located. A global deployment of thousands of desktops can be managed from the AWS console. And you can rapidly provision and de-provision according to the needs of your workforce.
