Bytes
Ansible Starter Pack

Claim yours now!

Bytes are currently offering a zero-cost 3-day Ansible starter pack. That's 3 days of services, designed for new Ansible customers.

Red Hat Ansible Automation Platform supports a variety of platforms across servers, clouds, networks, containers and more to meet you where you are in your automation journey.

This great opportunity to try Ansible Automation FREE for 3 days will give you the tools you need to confidently use Ansible Automation at its full potential. The automation solution includes everything you need to build, deploy, and manage end-to-end automation at scale.

Why Ansible?

Accelerate. Get started faster by combining the power of Ansible's massive open source community and prebuilt content collections of the most-used Ansible roles and modules. Codify your infrastructure and share across teams and individuals where you are already running deployments, whether on-premise or in the cloud.

Orchestrate. Easily transfer your automation into multiple domains and across different use cases. Stakeholders across developer, operator, and line-of-business teams can now engage with Ansible Automation Platform in ways that work best for them and make sense for their individual roles without slowing development time.

Innovate. Take your automation even further with analytics, policy and governance, and content management. Ansible Automation Platform tools make day-to-day life more efficient, allowing you to solve problems once and share the results with everyone.

Why Bytes?

Bytes are a leading Premier Plus Partner in the UK, with dedicated Sales, Pre Sales & Delivery Resource. **Bytes are fully behind Ansible and understand that adoption of such a bleeding edge technology may be complex. With that in mind we offer the Ansible starter pack - 3 days of services designed to get you up and running from day 1.**

Ansible Starter Pack - what's involved?:

- ✔ Day 1 - Workshop to deliver the principles of IT automation, benefits of Ansible Automation and ROI.
- ✔ Day 2 - Installation of Ansible Automation (either fully purchased sub or Eval key).
- ✔ Day 3 - Help the customer create or download playbooks & ongoing support.
