Gain a bird's eye view across your enterprise with SIEM for a modern world.

Modern SecOps Engagement

Bytes provide world class expertise. From security, storage and virtualisation to licensing, digital transformation and managed services. Our breadth of insight & experience has helped hundreds of the worlds best known brands and will do the same for your business. The added value from our passionate, customer focused, service driven people will help you achieve more.

Microsoft Sentinel delivers intelligent security analytics and threat intelligence across the enterprise, providing a single solution for alert detection, threat visibility, proactive hunting, and threat response.

Get an overview of Microsoft Sentinel along with insights on active threats to your Microsoft 365 cloud and on-premises environments with a Modern SecOps Engagement.

Engagement Highlights

- Understand the features and benefits of Microsoft Sentinel and Unified SecOps Platform
- Gain visibility into threats across email, identity, endpoints, and non-Microsoft data
- Better understand, prioritise, and mitigate potential threat vectors
- Create a defined deployment roadmap based on your environment and goals
- Develop joint plans and next steps

Microsoft

An engagement designed to meet of your security operations needs.

Using a modular approach, we will allow you to customise the engagement to meet your specific security operations needs.

Threat Exploration:
If your organisation is interested in learning how to integrate Microsoft Sentinel in your existing SOC by replacing or augmenting an existing SIEM, we will work with your SecOps team and provide additional readiness to bring them up to speed.

Remote Monitoring:
If your organisation doesn't have its own security operations centre (SOC) or if you want to offload some monitoring tasks, we will demonstrate how **Bytes** can perform remote monitoring and threat hunting for you.

What's Included?

By participating in this engagement, our experts will work with you to:

- Analyse your requirements and priorities for a SIEM deployment and define your Success Criteria
- Define scope & deploy Microsoft Sentinel in production environment integrating with Microsoft and non-Microsoft solutions
- Discover threats to on-premises and cloud environments across email, identity, endpoints, and third-party data
- Remote monitoring* of Microsoft Sentinel incidents and proactive threat hunting to discover attack indicators **optional component*
- Recommend next steps on how to proceed with a production implementation of Microsoft Sentinel and the Unified SecOps Platform
