CLOUD PLATFORM
MANAGEMENT

Delivering visibility, accountability and optimisation of your cloud spend

The cloud is unstoppable. But few companies know how to stay in control when costs begin to spiral or where to find unique opportunities to unlock greater value.

That's where the Bytes Cloud Platform Management service makes the difference.

Our **award winning service** has a multi-layer structure that allows you to **choose the right options based on your goals** and is powered by our Quantum analytics platform:

Consulting & Workshops

Data Platform Modernisation	Contract Right Sizing	Cloud Fundamentals	Internet of Things
DevOps	Reserve Instance Management	Modernisation Adoption	Cloud Security
Machine Learning & AI	Data Analytics	Digital Projects Integration	Cloud Architects

Core Services

Cost Management	Asset Management	Optimisation Recommendations

Quantum Platform

Azure based	Independent IP	Fully Integrated	AI Enabled

Optimise cloud spend.
Maximise cloud potential.

Monitor Cloud Spend
- Visualise data in multiple levels and views
- Track usage & cost trends
- Detect spend anomalies & usage inefficiencies
- Forecast future spend based on historical data

Drive Organisational Accountability
- Allocate resources to business units and departments
- Produce charge back and show back reports
- Let teams access data and insights
- Alert stakeholders for spending anomalies and overspending risks

Optimise Cloud Efficiency
- Increase resource utilisation with virtual machine right-sizing
- Eliminate idle resources
- Improve reserve instance management
- Apply and manage marketplace solutions

Future-Proof Commercials and Contracts
- Gain a full understanding of what costs look like on different Azure agreements
- Make clear cost comparisons with other cloud vendors
- Achieve the highest discounts for your entire Microsoft estate and licensing agreements

It's **quick** to get started **and simple** to delve deeper

Bytes
CLOUD PLATFORM MANAGEMENT

Azure

Cloud management **tailored to your business.**

Our Core Service
powered by Quantum

Consulting & Workshops

Our CPM Service provides a PowerBI dashboard with a set of reports that can be easily filtered to show the exact resources and costs within a given timeframe, region, resource group, resource type, or subscription.

Key reporting options include:

- ✓ **Cost Management:** Overview of Azure costs by account, service (infrastructure, storage, databases, networking, applications), as well as trends over time

- ✓ **Asset Management.** A report showing costs and consumption levels for individual resources across regions, accounts, subscriptions and date ranges.

- ✓ **Resource Tracker.** Report showing the number and type of new resources deployed each month enabling you to quickly spot and investigate unusual changes in Azure deployments.

- ✓ **Optimisation Recommendations.** Outline reporting of potential savings that could be made via a combination of strategies such as Reserved Instances and Hybrid Benefit.

✓ **Velocity Workshops**

Half-day workshops covering key areas such as Data Analytics, Machine Learning, AI, IoT and DevOps. Workshops can also be tailored to your unique requirements covering aspects such as how to accelerate cloud adoption, uncover new relevant cloud capabilities that could enhance your business or best practices to ensure good governance.

✓ **Consultant-as-a-Service**

Bytes consultants can review your current and planned use of cloud to ensure the most cost-effective buying strategies are in place to optimise your costs. Additionally, our technical specialists can work with you to review possible projects and potential new workloads for cloud adoption.

As a standard part of the service Bytes will provide you with a regular snapshot of your cloud spend, highlighting key trends and insights to help you steer your cloud journey and optimise costs.

Our extensive skills and experience across Bytes can support you as and when required.

Bytes manage **£350m** in Azure

More than **800** Azure customers choose Bytes

We'd love to tell you more

It's always worth exploring your best options and setting your cloud journey on the right path.
