

Bytes Copilot for Microsoft 365 Readiness Assessment

Powered by **Block64**

How prepared is your environment for AI?

Bytes can quickly deliver an overall Copilot for Microsoft 365 Readiness score based on your current security posture, user licensing, and the way your users are using Microsoft applications today.

Using Microsoft's standard Zero Trust Questionnaire, and tapping into your Microsoft Cloud Portal data, recommendations are made to remediate any risk that's uncovered, optimise licensing to prepare for Copilot Addon, and encourage users to adopt optimal habits in Teams, OneDrive and SharePoint for future success with a Copilot rollout.

Readiness Metrics

How it's calculated

Security

Your Copilot for Microsoft 365 Readiness Security score is the average of three inputs: your approximate Zero Trust Maturity, your Azure Secure Score and your M365 Secure Score. Unique recommendations are given to increase scores in all three areas.

Licensing

Your Copilot for Microsoft 365 Readiness Licensing score is based on the percentage of your users who are licensed with a prerequisite Microsoft product for Copilot. Recommendations are given for remaining users who'll need a licensing change before being able to add Copilot.

Optimisation

Your Copilot for Microsoft 365 Readiness Optimization score is based on the percentages of active users you have today with each of the Teams, OneDrive and SharePoint applications. Recommendations are given on increasing adoption of these tools in advance of rolling out Copilot.

Engagement Overview

Microsoft's tool partner Block 64 provides an agentless, cross platform discovery tool that leverages standard ports and protocols to gather the data required to produce 360-degree view of your environment for this assessment.

Engagement Length

Our engagements typically only require 2 hours of your team's time - from end-to-end, including the debrief. You'll be left with a valuable action plan and the ability to dive deeper into the gathered insights.

Security

Bytes is a SOC 2 Type II certified organisation and ensures the security and confidentiality of your data throughout this engagement. Your data is destroyed at the conclusion of our work.

Data Privacy

Your data is your data, and that's that. No data is gathered or shared without your express consent, which can be withdrawn at any time. The data is exclusively used to present your personalised roadmap.

The Bytes Copilot for Microsoft 365 Readiness Assessment, powered by Block64, will ensure you're ready for Copilot, using the power of our data-driven assessments, detailed reporting, and decades of Microsoft expertise.
