

WINDOWS 10 MIGRATION SERVICES

Windows 7 End of Life is approaching – now is the time to think about what's next for your IT environment. Windows 10 is Microsoft's most secure operating system ever, providing your business with the tools you need to do more and stay secure.

With any migration project there is a lot to consider to ensure a successful upgrade within budget.

HOW TO GET STARTED

If you're at the beginning of your migration journey, Bytes offer a FOC strategy session to understand your current environment and produce a project plan for you. We'll help you to get the best results faster - so you can gain the greatest benefit from Windows 10.

Let us answer
these important
questions

Do you have visibility of all the apps in your estate, who accesses them and when? Is there an opportunity for rationalisation or standardisation of versions?

How will your apps work on Windows 10?

How are you going to migrate your user profiles to Windows 10? Do you have a process for this?

Do you have legacy apps and how will you deliver these? If you choose to package apps, Bytes can help to virtualise 100% of apps

Do you use VDI, RDS, App-V or Citrix? Bytes can help you to determine the best delivery method based the app type and usage

Is your SCCM deployment able to support your migration strategy?

How do you profile your users and define the best workspace to deliver to them?

What features do you use?
How are you managing documents?

Are you making the most of the Windows 10 platform, and all of the added features and enhancements?

How are all Windows endpoints and applications patched?

How are you securing the data on users endpoints and ensuring regular back up?

What upgrade planning and execution are you putting in place for Windows 10 Evergreen?

How do you manage mobile devices and ensure that apps are delivered securely?
