

This engagement supports organisations moving from Office 365 to Microsoft 365. Activities include assessments, solution design, PoC delivery, and adoption planning, to showcase the value of enhanced security and compliance.

## **Problems and solutions**

The Secure Productivity Envisioning and PoC is organised into three simple pillars.

# Harness the power of productivity tools and Al

### **Secure productivity**

Transform the way you work while reducing security risks with productivity apps and Al experiences.

### **Al-ready business protection**

Protect your organisation and business data, ensuring your people have access to the tools, resources, and applications they need.

### **Optimised IT enablement**

Empower your IT teams to enhance business potential through performance, reliability, and safety, provided by optimised cloud infrastructure control.

# **Apply Zero Trust principles to Copilot**

# Secure access to Copilot

- Require phishingresistant multifactor authentication for all administrators and users
- Enforce access controls using Conditional Access policies

# Mitigate device risk

- Enroll devices into managementSet compliance
- Set compliance policies and require health/ compliant devices
- Deploy device profiles

# Protect data in applications

 Use Intune App protection policies (APP) to ensure data in specified apps can't be copied or pasted to other apps on the device

### Microsoft Intune P1

# Prevent data oversharing

- Categorise data with sensitivity labels
- Use sensitivity label policy settings for default and mandatory labelling
- Ensure all users have Just Enough Access (JEA)

# - 5

# Protect against threats

- Use threat protection services to mitigate risk
- Detect and respond to security incidents

# **Deliverables**

- Security and compliance assessments
- Solution overview and roadmap
- PoC and pilot deployments
- Business case development
- IT admin and end-user training

# **Applicable workloads**

- Microsoft 365
- · Microsoft Teams
- Windows 11
- Enterprise mobility and security pricing options

# **Customer eligibility**

The following engagement levels are available.

## **Small engagement**

- >500 seats of Office 365 E1/E3 or Microsoft 365 Apps Standalone
- Intune usage <50% of total seats

### **Medium engagement**

- >1,500 seats of Office 365 E1/E3 or Microsoft 365 Apps Standalone
- Intune usage <50% of total seats

### Large engagement

 >3,000 seats of Office 365 E1/E3 or Microsoft 365 Apps Standalone plus minimum spend of \$500k+

Once you decide to go ahead with this funded engagement, a Customer Success Manager (CSM) will guide you through the process. They will understand exactly what needs to be achieved from the engagement, and they will tailor Bytes delivery of the services to match your required outcomes.

Following the engagement, your CSM will continue to support your journey, ensuring you gain lasting value from the technology.

# Take the next step towards secure, **Al-powered productivity.**
