

# 3 Ways to Optimise & Cut Costs in the AWS Cloud

/ Slash cloud costs with Byte-Sized Strategies /

## Maximising Efficiency with Automated FinOps

Automated FinOps provide a comprehensive solution to the challenges faced by businesses in AWS cloud management.

Streamline manual tracking to save time and ensure accuracy

Offer predictive costing models via advanced analytics and machine learning

Full financial transparency with dashboards and reports

**82%** of all organisations have difficulty managing cloud spend

## Navigating the Cloud Centre of Excellence Journey (CcoE)

A strategic approach that serves as a guiding compass for businesses seeking to harness the full potential of AWS services.

Robust cloud governance to ensure industry standards, security and regulatory requirements are met

Clear business alignment between cloud strategies and broader objectives

Centralise decision making to enhance efficiencies of cloud implementations

**60%** of companies report that cloud costs are too high or higher than they should be

## Unlocking the significance of Well-Architected Reviews (WAR)

Ensuring that your AWS architecture aligns with best practices and standards is paramount. AWS Well-Architected Reviews (WAR) offers a strategic approach to optimising your cloud infrastructure.

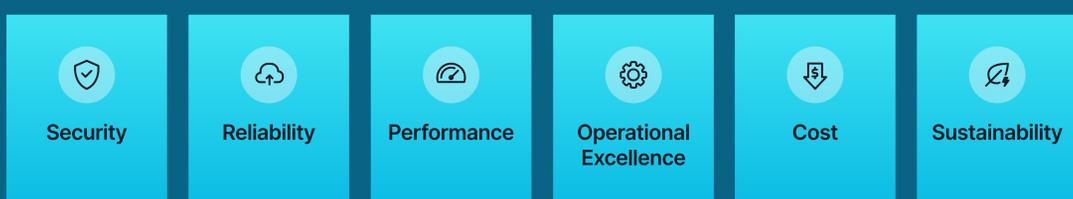

Enhanced security posture and compliance with industry standards

Optimised infrastructure costs from implementing WAR recommendations

Improved reliability and less downtime following WAR framework alignment

By working with Bytes, not only do you benefit from years of knowledge and expertise, but you will gain access to deeper levels of discounts and funding options to help your business save money!

### THE 6 PILLARS of the AWS Well-Architected Framework

### What our customers say

"Bytes helped us reduce costs by 30% by intelligent management of commitments and visibility on zombie infrastructure and rightsizing opps."

– Cloud Platforms Manager, FSI
