

Lock in the future of your secure AI journey.

A long-term AI foundation, built to keep you ahead.

If you're running ME3 or ME5, actively using Copilot, and beginning to deploy agents, you've moved beyond experimentation.

Microsoft 365 E7 is designed for customers who want to:

- ✓ Operationalise AI and agents across the enterprise
- ✓ Strengthen governance as autonomy increases
- ✓ Simplify security and compliance at scale
- ✓ Lock in pricing certainty as AI usage accelerates

Exclusive Triennial (3-year) Offer for Committed AI Leaders

15% off

Frontier Suite Microsoft 365 E7

3-year commitment

300+ seats

This triennial (3-year) offer rewards long-term transformation by delivering:

- ✓ **Price protection** as AI, Copilot, and agent usage scales
- ✓ **Predictable spend** across security, compliance, and AI operations
- ✓ **Built-in savings** without sacrificing flexibility or capability

ME7 Frontier Suite

 Microsoft 365

Microsoft 365 E5

The security and compliance foundation for enterprise-grade productivity

Microsoft Entra Suite

Identity, access, and policy enforcement for autonomous systems

Microsoft 365 Copilot

AI embedded across the flow of work

Microsoft Agent 365

Discovery, governance, and lifecycle management for AI agents

One Platform. One Commitment. Long-Term Value.

Together, ME7 enables people, Copilot, and agents to work at scale, on a secure, governed foundation built for the Frontier Firm.

Secure access and device readiness for modern work

Ensure people, Copilot, and agents can access apps and data safely, across identities, devices, and locations, without friction slowing down daily work.

Built-in productivity with AI at the core of workstreams

Embed Copilot directly into everyday workflows to accelerate insight, content creation, decision-making, and collaboration, turning AI into a daily productivity multiplier.

Enterprise-grade security and compliance at scale

Protect users, endpoints, and sensitive data while meeting regulatory and risk requirements, keeping AI-driven work secure, governed, and audit-ready as usage grows.

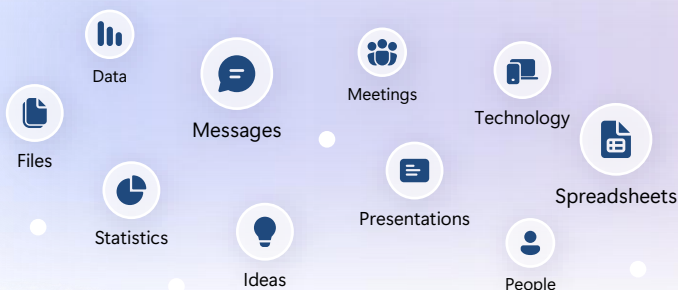

Agent expansion with governance by design

Confidently scale autonomous and semi-autonomous agents with the controls, visibility, and oversight needed to manage how agents act, access data, and operate across the business.

You empower your AI agents with the knowledge and context of your business

And you extend your enterprise controls from users to Agents

With ME7, AI and agents don't just exist, they operate securely, governed, and ready for scale.

Bytes are here to help shape your AI strategy. With Microsoft Copilot and Adoption & Change Management specialisations, we are perfectly placed to support you at every stage.
