### Zero Trust Access

Least Friction Possible

### **Three Fundamental Properties**

## **Adopting Zero Trust**

## Beyond the Buzzword: Security Leaders Today

0

### Stage 0: Fragmented identity

- Active Directory onpremises
- No cloud integration
- Passwords everywhere

#### Stage 1: Jnified IAN

- Single sign-on across employees, contractors partners
- Modern multi-factor authentication
- Unified policies across apps and servers

### Stage 2: Contextual Access

#### Stage 3: Adaptive Workforce

- Context-based access
  policies
- Multiple factors deployed across user groups
- Automated deprovisioning for leavers
- Secure access to APIs

**18%** of organizations have a **fully automated** provisioning/deprovisioning mechanism **for employees** 

Only **7%** have automated provisioning/deprovisioning **for external users** 

ADOPTIO

Stage 0: Fragmented identity

- Active Directory onpremises
- No cloud integration
- Passwords everywhere

#### Stage 1: Jnified IAM

- Single sign-on across employees, contractors, partners
- Modern multi-factor authentication
- Unified policies across apps and servers

## ial

- Context-based access policies
- Multiple factors deployed across user groups
- Automated deprovisioning for leavers
- Secure access to API

### Stage 3: Adaptive User Base

- Risk-based access
  policies
- Continuous and adaptive authentication and authorization
- Frictionless access
- Only **8%** have implemented **passwordless** access
